

**ST6™**

LED Signage Module

Single Color Module**Single Color Module**

Beyond LED's ST6 LED modules are high quality and specially designed for new construction or retrofit of small, medium size channel letters. Available in Bright white, warm white, Red, Green, Blue and RGB as well as an array of wattage. ST6 modules are easily customized to meet any customer specification. Installation with double-sided VHB 3M tape ensures these modules will stand the test of time. An IP67, ultrasonically welded body also guarantees water resistance in signage applications.
